Oluwatimilehin Alvin Alabi

Regina, SK, Canada | alabialvin@gmail.com | linkedin.com/in/alviiin

EDUCATION

University of Regina, Regina, SK: MEng Software Systems Engineering, GPA: 91.75% **Expected Graduation: 12/27**
Covenant University, Ota, Ogun State, NG: BEng Electrical and Electronics Engineering 2018 - 2024

SECURITY EXPERIENCE

Enterprise Security Co-op Student, SaskEnergy, Regina, SK 09/26 - Present

- Assess security controls through risk assessments and exception requests, documenting risk and remediation timelines.
- Review security policies, third-party risk agreements and access reports to support internal audit.
- Triage email threat alerts (Abnormal Security) and security events in ServiceNow, tracking incidents to closure.
- Contribute to the enterprise-wide Business Continuity Plan and an incident response tabletop exercise with stakeholders.
- Support Cybersecurity Awareness Month by staffing the booth and interactive employee games; built PhishLock, a phishing awareness game, using Azure Pipelines for CI/CD with SAST scanning and Vercel deployment.

Cybersecurity Contractor (Part Time), Crest Technologies, Lagos, Nigeria 09/22 - 04/25

- Ran penetration tests (VAPT) and black-box API assessments for fintech clients handling financial data.
- Ran compliance audits for a national energy corporation and wrote client reports with risk ratings and remediation steps.

Site Reliability Engineer / App Support Developer (Remote), Asians Group LLC, Casper, WY 07/25 - 03/26

- Analyzed proxy logs in Elasticsearch to refine WAF rules (1.4M requests/hour); cut incident resolution time by **40%**.

Technical Support Engineering Intern (Full Time, Remote), Advancly, Lagos, Nigeria 09/24 - 07/25

- Deployed Azure WAF and Application Gateway for digital banking services; owned post-deployment log monitoring.
- Built Azure dashboards and alerts that cut incident detection time by **80%**.

VULNERABILITY RESEARCH AND COMPETITIONS

- **Swiss web hosting provider (responsible disclosure):** 8 reports submitted, **3 rewarded**: unauthenticated customer backup download, reusable CAPTCHA enabling password reset abuse, and username enumeration.
- **Yogosha (invite-only, admitted by technical assessment): 4 accepted findings** on a private nonprofit program: **1 High** (unauthenticated file upload) and **3 Medium** (reflected XSS, API key exposure, secrets in public JavaScript).
- **HackerOne:** Team Nigeria, HackerOne Ambassador World Cup; invited to private programs.
- **NCC Group and Mastercard CTF National Finals, Montreal (06/26): 4th of 27** Canadian post-secondary teams (3rd at West Regionals), representing the University of Regina.
- **BSides Regina and MagpieCTF (U of Calgary), 2026:** 2nd place in both.
- **CyberSci Regionals, West (Fall 2026), University of Regina team:** competing in a team-based CTF covering web exploitation, forensics and incident response.

PROJECTS AND COMMUNITY

- **Detection Engineering (Freelance):** Built and delivered for a client a Python feature extraction pipeline and RNN that flags living off the land binary (LOLBAS) abuse in Windows command line data.
- **Active Directory Attack and Threat Hunting Lab:** Built a Windows AD, pfSense and Splunk SIEM lab; ran Atomic Red Team tests mapped to MITRE ATT&CK and hunted for them in Splunk.
- **Volunteer, Google Developer Group Lagos:** One of 3 volunteers who organized the first GDG Lagos Cyber Security event (05/23), which started its cybersecurity programming; stayed on for later events and built a deliberately vulnerable IDOR lab for the CyberQuest CTF. 03/23 - 09/25

Member, University of Regina Cybersecurity Club 01/26 - Present
Cybersecurity Lead, GDG on Campus, Covenant University 09/22 - 08/24

CERTIFICATIONS AND SKILLS

Certifications: eJPT (INE, 2023), PT1 Junior Penetration Tester (TryHackMe, 2025), CAP Certified AppSec Practitioner (SecOps Group, 2026), AWS Certified Cloud Practitioner
Training: SOC 101 (TCM Security); Linux Attack, Detection and Forensics v2.1 (PurpleLabs, in progress)
Scripting: Python, Bash, SQL, JavaScript/TypeScript | **OS:** Linux (Kali, Ubuntu, Arch), Windows, macOS
Offensive: Burp Suite, **Nmap**, ffuf, sqlmap, Nuclei, Amass; OWASP Top 10, MITRE ATT&CK, vulnerability research
Detection and Response: Splunk, ELK Stack, Sysmon, Wireshark, CrowdSec, Fail2ban, Active Directory
Networking and Cloud: TCP/IP, DNS, HTTP/S; Azure, AWS, GCP, Docker
